Virtual Desktop Solutions

The Fastest Way to Computerize Your Business

With our Virtual Desktop solution, your local workstation or laptop connects to your Virtual Desktop and associated applications running in our secure data center. A low-power thin client, like that pictured below, connects your local hardware to the Internet and thereby to your Virtual Desktop. Only your combination of hardware terminal key and password can access your Virtual Desktop and its associated data and software. Watch our video demo at wysestore.com.

Your data, documents, software, and operating system can actually be better managed at a secure data center than on a laptop or desktop that can crash or worse... get stolen. There is no worry about costly PC repairs. Installations, upgrades, patches, backups, and complete maintenance can be performed from our data center, with more confidence and without user intervention.

Organizations with branch offices, remote workers, or offsite facilities can host each employee's desktop or laptop at our data center such that all computing environments are standardized and secure.

Increase Your Profits By Cutting Costs

Our Virtual Desktops provide data security and cost-saving capabilities far beyond what you can expect from a conventional computer system. We are experts at helping you boost your bottom line by increasing security and efficiency.

Solutions Tailored to Your Business

Through our partnership with AISO.net, we can offer the full functionality of more

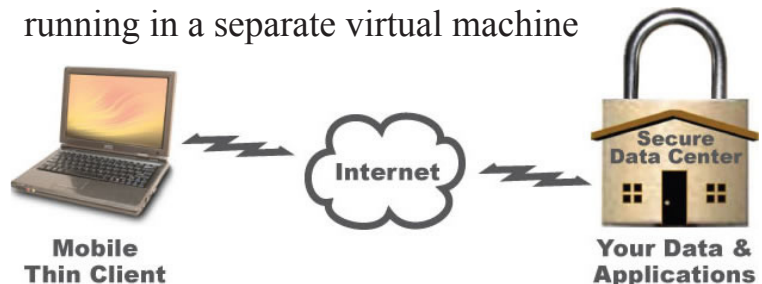

expensive computer systems at a cost-effective price—based on the actual needs of businesses like yours.

Reliable, Low Maintenance, Energy-Efficient Operation

With applications managed centrally on energy efficient VMWare located at our data center, and reliable (low power, no moving parts) thin clients maintaining the connections to your local workstation, you will achieve a high degree of overall reliability while minimizing energy use and costly maintenance. Computing environments can be standardized across geographically-separated facilities. Software installations, upgrades, patches and backups are performed at our data center.

Instant Recovery

Computing environments are encapsulated inside VMware virtual machines and maintained in our data center where, in the event of a disaster, they can be instantly recovered and redeployed within minutes using our VM SnapShot technology. Moreover, if one workstation crashes, it will not affect another station because it's running in a separate virtual machine

Data Security

Our Virtual Desktop solution enables organizations to move sensitive data—normally stored on a local PC—into our secure data center to maintain data integrity and meet regulatory compliance requirements (HIPAA, Sarbanes-Oxley, and Gramm-Leach-Bliley).

Virtual Desktop Computers

The PC manufacturer's best-kept secret: There is no need to purchase, upgrade, or repair desktops or laptop computers.

Why treat computers like old shoes—disposable items that last only a year or two? Why purchase thousands of dollars worth of hardware and software just to perform simple functions? Most of the data we produce does not require the processing power and energy used in traditional PC's. In fact, most computing tasks can be easily done with a Virtual Desktop Computer.

The days of upgrading computers and software are gone. AISO.net has integrated trusted hardware and our Solar Network to provide the world with computer applications anywhere, anytime.

How does it work?

Simply access your Virtual Desktop remotely using a small terminal which we call a Virtual Desktop Computer. Your applications and data will be in the exact state as when you left them. Watch our demo at wysestore.com.

What is a Virtual Desktop Computer?

In short, it is a microcomputer without a hard drive (also known as a Thin Client). The hard drive is the clunky, failing, and often loud antique technology that attempts to store your important documents and irreplaceable files.

A Virtual Desktop Computer is a complete computer but better—liberating you from the mundane tasks of maintenance, backing-up, repairs, upgrades, and in the eyes of the PC manufacturers: being obsolete.

NOTE: This type of PC solution is NOT recommended for gaming. It is recommended for light to medium CPU/Graphics intense applications, and does not support a CD-ROM/DVD drive or CD/DVD burning.

Information subject to change without notice. If you would like more information, please call us at our toll free number 800-469-6484.

S Series Specifications:

- 7.5" x 2.5" x 5.5"
- Durable metal and plastics
- Monitor output
- 2 x USB ports
- 1 x AUX input
- 1 x AUX output

Technologies:

- AISO.net infrastructure
- AMD Geode GX 1 watt processor
- Redundant Cisco ASA firewalls
- IDS systems

Productivity Benefits:

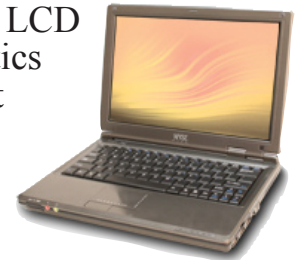

- Never any data loss
- No moving parts
- No IT support required
- AISO support on standby
- Greenworld support
- 99.9+% Uptime

Piggyback Mounting Option

Laptop Specifications:

- 12.1" or 15.4" diagonal LCD
- Durable metal and plastics
- External monitor output
- USB ports
- Mic input
- Speaker output

Environmental Benefits:

- Lower energy required (avg 5 watts)
- WEEE recycling standards
- ISO 14001 & ROHS Certified
- Less transportation costs
- Less material waste
- Low heat output
- Solar Powered Data Center

Wyse Recertified Thin Clients

What happens when a Wyse customer decides they've ordered the incorrect product ... after they've opened the box?

WE MARK THEM DOWN!

DRASTICALLY! Purchasing from our WYSE STORE means **BIG SAVINGS** on bestsellers. We're clearing the warehouse of these items by **SACRIFICING THEM** at amazing prices! Original manufacturer warranties may apply. We offer a 30 day limited depot warranty from ship date on units with expired manufacturer limited warranties. Our Wyse Factory Authorized Recertified Wintermes are in "like new" condition. There are no major cosmetic defects and have no signs of wear & tear. In most cases, these terminals have never even been used!

More about "Wyse Factory Recertified" products:

- All current Field Engineering Bulletin (FEB) upgrades are done
- Components are new and to original specifications
- Plastics are like new—no major cosmetic defects
- Product passes Wyse Technology's Quality Assurance inspection
- Product is packaged in new Wyse packaging
- Includes power cord and set up manual
- All Wyse Factory Recertified terminals are backed by our one-year warranty

Wyse Thin Clients

Enterprises spend billions of dollars to ensure that their computer systems are secure, reliable, and agile. Wyse elegantly, easily, and affordably eliminates these problems - and as a result, we save our customers enormous amounts of time and money.

The Wyse line of thin and now zero clients have led the industry for eleven years running. When integrated with additional hardware, software, and services they become part of a complete solution to a business problem.

Wyse thin clients run Windows, Java, Linux, UNIX and web-based applications safely on Microsoft Windows Terminal Services, Citrix application Delivery, and VMware Virtual Desktop Infrastructure servers using thin display protocols. Applications do not traverse the network and are not downloaded into the thin client, eliminating user security and bandwidth issues common with PCs.

Get the right tool for the right task. Consider the operating systems best for you (Wyse Thin OS, Wyse-enhanced Windows CE, Wyse Linux, Windows XPe) and then the platform (Streamline, Basic, Standard, Expandable, Integrated).

To learn more about thin-client operating systems, see our OS comparison chart at cintronicsonline.com/products/wintermes/wintermesoschart.php.

With Greater CPU Performance for Demanding
Applications

Wyse Recertified Thin Clients

Thin Clients				
	Simple: Wyse Thin OS A simple optimized thin client—easy to install. The perfect inexpensive ICA/RDP appliance.	Powerful: Windows CE Efficient and powerful; the right balance of features for users needing a Windows interface.	Adaptable: Wyse Linux An adaptable thin client that is scalable from a simple appliance to robust work-horse.	Flexible: Windows XPe A robust and flexible client—runs the most demanding local applications like video and Java.

Wyse Device Manager

Centralized Thin Client Management that's Scalable and Flexible

Pull it all together with a Preconfigured Server from Cintronics!

See catalog section SE.

1125SE STANDARD, THIN OS

- Monitor not included
- RDP/ICA support
 - Seamless multiple session support
 - Faster remote application execution than most thin clients
 - Image loading via DHCP and ftp
 - Plug-and-play
 - Stateless device
 - Data security/integrity
 - 10/100 wireless LAN/Ethernet connectivity
 - Fanless and diskless
 - Wyse Rapport thin client management
 - Warranty available
- 902059-01R, 16F/32R US

3150SE STANDARD, WIN CE

- Monitor not included
- Wyse firmware enhancements
 - Supports RDP 5.5 and ICA® 8.0 protocols, 15+ resident terminal emulations
 - AMD Geode GX CPU, high-speed video
 - 10/100Base-T Ethernet
 - 2 serial, 1 parallel, and 4 USB 2.0 ports
 - Convection cooled; no moving parts
 - Wyse Rapport (Workgroup ed.) thin client management
 - Warranty available
- 902086-01R, 32F/128R US

941GXL EXPANDABLE WIN XPE

Monitor not included

- Supports embedding of local Win 32-bit apps
 - Windows XP Embedded, SP 1
 - Optional hardware upgrades
 - Microsoft MediaPlayer, onboard AGP video, and 3D sound (option)
 - Connects to any VESA standard monitor
 - Supports latest RDP and ICA protocols
 - Standard VGA port
 - 10/100 BaseT Fast Ethernet/WakeOnLan
 - Warranty available
- 902073-21R, 512F/256R US
902073-58R, 512F/512R US

G90 EXPANDABLE WIN XPE

FEATURES:

- Dual-video support built in and optional support for up to six displays
 - High-performance CPU
 - Expansion bays for optional CD-ROM and hard drives (drives sold separately)
 - Integrated 10/100 Ethernet
 - Plug-and-play connectivity
 - Data security and integrity
 - Fanless solution
 - Wyse Device Manager
 - Warranty available
- 902126-01LR, 512F/512R US

S Class/V Class Single Video

S10 STREAMLINE, THIN OS

- RDP and ICA session support
- Seamless multiple session support
- Faster remote application execution than most thin clients
- Image loading via DHCP and ftp
- Plug-and-play connectivity
- Stateless device
- Data security and integrity
- 10/100 Ethernet
- No fans or disks
- Wyse Device Manager
- Warranty available

902110-01LR, 0F/128R US
902110-02LR, 0F/128R Intl

S30 STREAMLINE, WIN CE

- Supports RDP 6.X, ICA 10.x, and SGD 4.2 protocols, 15+ resident terminal emulations
- Supports latest Citrix ICA client (ver. 10.x) & digital dictation for ICA
- Industry-standard USB wireless adapter support with strong authentication
- AMD Geode GX™ CPU, high-speed video
- 10/100Base-T Ethernet
- 1 serial port, 4 USB 2.0
- Diskless, fanless
- Wyse Device Manager
